(54) VEHICULAR IMAGE DISPLAY

controlling the turning movement of the camera unit carried out by the actuator.

COPYRIGHT: (C)1994,JPO

(57) Abstract:

PURPOSE: To provide a vehicular image display by which required safety ascertainment to both sides can be performed by minimizing the head pushing-out amount of a vehicular even if the road visibility is bad.

CONSTITUTION: A vehicular image display is composed of a camera unit 41 rotatably attached to the front end of the bonnet of a vehicle, an actuator 45 for turning the camera unit, CCD cameras 42a, 42b placed on the camera unit, monitors 44a, 44b for displaying right and left images picked up by first and second image pickup means and a controller 47 for
